3.0 Success Ballast will apply (to a maximum 60kg) in each class as follows;

- 1st +20kg
- 2nd +15kg
- 3rd +10Kg
- 4th - 10Kg
- 5th - 15Kg
- 6th and below -20Kg

- No adjustment to ballast will be made during a race event, ballast will be accumulated, both + and -, over the race event from each race run and must be applied and maintained throughout the next event entered and started.
- No negative weights will be allowed.
- Success ballast must be carried in the car's passenger seat location and comply with Article 4.15.3 of the UAETC Technical regulations.
- Success ballast will only be reduced if a car starts the race (i.e. crossing the start line during the race).
- If a car is excluded from the results of a race no change will be made to the Success Ballast allocated to the car or its drivers.
- Competitors and entrants will be notified of any Success Ballast to be carried via a championship bulletin issued prior to the next event.
